

ABOUT ORGANIC VOICES

WHO WE ARE

At Organic Voices, we believe in trust.

Of course, trust must be earned. Thanks to tough federal organic standards, organic farmers and food companies have nothing to hide. It's the positive notion of knowing exactly what you're getting. We are a group of folks devoted to telling the story of organic agriculture and food production with the hope of instilling the peace of mind that going organic gives. Our aim is to cultivate a better understanding of what being organic really means and the environmental and health benefits choosing organic provides. We're pretty passionate about it and hope you will be too!
